

Link-Systems International, Inc.
Job Description

Position Description:

Title: CONTENT DEVELOPER - CHEMISTRY Salary: \$12.00/hour

Travel: None Start Date: TBD

Reports to: Director, Content Development

Daily Responsibilities:

Will work directly with other Link-Systems employees within our Content Development Division to create and maintain web-ready content. Responsibilities will include the creation of web projects that relate chemistry to real-life, development of randomized practice problems, collection and annotation of related web-links, and general utilization of the Internet as a research tool.

Position is full- or part-time, staff level, with opportunity of advancement.

Describe Ideal Candidate:

Someone with strong chemistry and logic skills, currently in school (we will accommodate class schedule, if necessary), or a recent graduate of college. Candidate must also understand basic programming concepts and be Internet savvy. Must be flexible, willing, and able to learn new skills.

Position Requirements:

- Must be enrolled in college program, with at least two years completed. Bachelors in Arts or Sciences in chemistry related discipline preferred.
- Strong college-level chemistry skills.
- Exposure to entry-level programming and/or HTML preferred.
- Any exposure to XML, JavaScript, Perl/CGI a bonus (but not required).
- Any familiarity with text conversion a bonus (but not required).
